Building Permit Application Checklist

Items Required for a Complete Building Application Submission

□ Comp	lete App	olication
--------	----------	-----------

- Copy of Deed (if not registered owner on file)
- □ Rural Property Declaration (attached)
- \Box One set of construction drawings (11x17), and one PDF version for the proposed structure
- Details may include but may not be limited to:
 - Footing size and depth
 - Foundation type and dimensions
 - Anchorage details
 - Framing details (including Engineers drawings if applicable)
 - Details of insulation and vapour barrier if installed
 - Interior and exterior finishes
- Plot plan showing location of the proposed accessory building in relation to property lines, wells, septic tank and bed, all other structures, and waterbodies (sample attached)
- Approvals from agencies considered applicable law such as:
 - CRCA (Cataraqui Region Conservation Authority)
 Emily Su: 613-546-4228 ext. 258
 www.crca.ca
 - Leeds Grenville and Lanark Health Unit Nancy Carpenter: 613-345-5685 ext. 5685
 - United Counties of Leeds and Grenville 1-613-342-3840
- Other permit and/or approvals may also be required from:
 - The St. Lawrence Parks Commission: 613-543-3704 www.parks.on.ca
 - Electrical Safety Authority: 1-877-372-7233 Esasafe.com
 - MNRF (Ministry of Natural Resources and Forestry): 613-531-5700
 - Ministry of Transportation Eastern Region (MTO) Stephen Kapusta: 613-545-4824 Stephen.Kapusta@Ontario.ca
- Pay all applicable fees according to the fees bylaw (attached)

Type of Construction	Value	Proposed Amendment	2022 Fee
Deposits	Value	Amenament	100
Non-Refundable	Value of Construction less	\$150	\$140
Administration fee to file	than \$30,000	•	·

Personal information contained in this form and schedules is collected under the authority of subsection 8(1.1) of the *Building Code Act, 1992*, and will be used in the administration and enforcement of the *Building Code Act, 1992*. Questions about the collection of personal information may be addressed to: a) the Chief Building Official of the municipality or upper-tier municipality to which this application is being made, or, b) the inspector having the powers and duties of a chief building official in relation to sewage systems or plumbing for an upper-tier municipality, board of health or conservation authority to whom this application is made, or, c) Director, Building and Development Branch, Ministry of Municipal Affairs and Housing 777 Bay St., 2nd Floor. Toronto, M5G 2E5 (416) 585-6666.

Guide to completeness and compliance with applicable law

J. Heritage Designation (for alteration/repair/renovation/demolition projects only)					
Has this property been designated under The Ontario Heritage Act?	☐ Yes ☐ No Initials:				
Has this property been designated as a property of interest by the Municipal Heritage Committee?	☐ Yes ☐ No Initials:				
K. Minimum Distance Separation (for construction of new dwelling or livest					
Is there an existing or proposed barn or livestock facility within 1000 m of an existing or proposed dwelling? If yes, please obtain a copy of Schedule 3 <i>Minimum Distance Separation Formulae</i> , which is available on our website or by contacting the Township office.	☐ Yes ☐ No Initials:				
L. Approvals from Other Agencies					
Cataraqui Region Conservation Authority approval required if construction is within 15 metres of a flood plain, 50 metres of a water course, a Locally Significant Wetland, an Area of Natural and Scientific Interest, within 120 metres of a Provincially Significant Wetland or within 30 metres of all other wetlands greater than 0.5 ha.	☐ Yes ☐ No Initials: If 'Yes", date approval obtained from CRCA:				
Leeds, Grenville and Lanark District Health Unit approval required if new construction, an addition, or an increase in the number of bedrooms or plumbing fixtures.	☐ Yes ☐ No Initials: If 'Yes", date approval obtained from Health Unit:				
St. Lawrence Parks Commission approval required if the construction is within 150 feet of, or fronts or backs onto, the 1000 Islands Parkway.	☐ Yes ☐ No Initials: If 'Yes", date approval obtained from SLPC:				
Other Agency Indicate Agency	☐ Yes ☐ No Initials: If 'Yes", date approval obtained				
M. Owner's Authorization					
I,, am the owner of the land that is subject of the	nis application for a building permit in the				
Township of Leeds and the Thousand Islands and I authorize	to make this application on				
my behalf.					
Date: Signature of Owner:					
IMPORTANT INFORMATION					
The Municipality notifies the following agencies concerning the approval of	your building permit application:				
Municipal Property Assessment Corporation Electrical Safety	Authority				
Statistics Canada Leeds, Grenville & Lanark District Health Unit					
Tarion New Home Warranty Canada Mortgage	ge & Housing				
Ministry of Labour					

** Failure to submit any of the required information may result in your application being returned. **

Records of Site Condition O.Reg. 153/04

When a property is being proposed for a more sensitive land use than its current or most recent use then a Record of Site Condition (RSC) per the Environmental Protection Act (EPA) is required prior to land use change.

Please indicate ('x') if the lands in respect of which the building permit application is made have been used for any of the following uses:

Х	Potentially Contaminating Activity	Х	Potentially Contaminating Activity
	Acid and Alkali Manufacturing, Processing and Bulk Storage		Importation of Fill Material of Unknown Quality
	Adhesives and Resins Manufacturing, Processing and Bulk Storage		Ink Manufacturing, Processing and Bulk Storage
	Airstrips and Hangars Operation		Iron and Steel Manufacturing and Processing
	Antifreeze and De-icing Manufacturing and Bulk Storage		Metal Treatment, Coating, Plating and Finishing
	Asphalt and Bitumen Manufacturing		Metal Fabrication
	Battery Manufacturing, Recycling and Bulk Storage		Mining, Smelting and Refining; Ore Processing; Tailings Storage
	Boat Manufacturing		Oil Production
	Chemical Manufacturing, Processing and Bulk Storage		Operation of Dry Cleaning Equipment (where chemicals are used)
	Coal Gasification		Ordnance Use
	Commercial Autobody Shops		Paints Manufacturing, Processing and Bulk Storage
	Commercial Trucking and Container Terminals		Pesticides (including Herbicides, Fungicides and Anti- Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
	Concrete, Cement and Lime Manufacturing		Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
	Cosmetics Manufacturing, Processing and Bulk Storage		Pharmaceutical Manufacturing and Processing
	Crude Oil Refining, Processing and Bulk Storage		Plastics (including Fibreglass) Manufacturing and Processing
	Discharge of Brine related to oil and gas production		Port Activities, including Operation and Maintenance of Wharves and Docks
	Drum and Barrel and Tank Reconditioning and Recycling		Pulp, Paper and Paperboard Manufacturing and Processing
	Dye Manufacturing, Processing and Bulk Storage		Rail Yards, Tracks and Spurs
	Electricity Generation, Transformation and Power Stations		Rubber Manufacturing and Processing
	Electronic and Computer Equipment Manufacturing		Salt Manufacturing, Processing and Bulk Storage
	Explosives and Ammunition Manufacturing, Production and Bulk Storage		Salvage Yard, including automobile wrecking
	Explosives and Firing Range		Soap and Detergent Manufacturing, Processing and Bulk Storage
	Fertilizer Manufacturing, Processing and Bulk Storage		Solvent Manufacturing, Processing and Bulk Storage
	Fire Retardant Manufacturing, Processing and Bulk Storage		Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
	Fire Training		Tannery
	Flocculants Manufacturing, Processing and Bulk Storage		Textile Manufacturing and Processing
	Foam and Expanded Foam Manufacturing and Processing		Transformer Manufacturing, Processing and Use
	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles		Treatment of Sewage equal to or greater than 10,000 litres per day
	Gasoline and Associated Products Storage in Fixed Tanks		Vehicles and Associated Parts Manufacturing
	Glass Manufacturing		Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
			Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products

Schedule 1: Designer Information

Use one form for each individual who reviews and takes responsibility for design activities with respect to the project.

The information contained in this so	chedule is true t	to the best of my knowledge.				
I have submitted this application with the knowledge and consent of the firm.						
 Date		Signature of Designer				

NOTE:

- 1. For the purposes of this form, "individual" means the "person" referred to in Clause 3.2.4.7(1) d).of Division C, Article 3.2.5.1. of Division C, and all other persons who are exempt from qualification under Subsections 3.2.4. and 3.2.5. of Division C.
- Schedule 1 is not required to be completed by a holder of a license, temporary license, or a certificate of practice, issued by the Ontario
 Association of Architects. Schedule 1 is also not required to be completed by a holder of a license to practise, a limited license to practise,
 or a certificate of authorization, issued by the Association of Professional Engineers of Ontario.

Plot Plan **Required for all new construction and demolitions**

All structures and buildings in the Municipality must conform to the Township's Zoning By-Law as it is applicable law. In order to ensure that the proposed structure is in compliance with the Zoning By-Law, a complete plot plan with the following information is required for review:

Tollowing information is required for review:						
Plot Plan Check List - Property Information						
Dimensions of the property	☐ Dimensions and area of existing and proposed structures					
Location of existing or proposed septic system and well	Height of the proposed structure					
Approximate location of all natural and artificial features	Name of any road/private right-of-way within or abutting property					
From the nearest point of the new construction:	☐ Distance to the high water mark (if applicable)					
Setbacks to centerline of adjacent roads	Distance to all property lines					
Distance to the edge of adjacent right-of-ways	Distance from accessory structure to main use					
Check here if the Plot Plan is on a separate piece of paper and	d is attached to this application.					
New Construction is to be a minimum of ☐ 5 ft from septic tank ☐ 16 ft from hydro lines. Please Indicate the distances on the plo

Form authorized by OHBA, OBOA, LMCBO. February 6, 2012

Guide to the Energy Efficiency Design Summary Form

The *Energy Efficiency Design Summary* form summarizes the compliance path used by a house designer to comply with energy efficiency requirements of the Ontario Building Code. This form must accompany the building permit application. The information on this form MUST reflect the drawings and specifications being submitted, or the building permit may be refused. Refer to Supplementary Standard SB-12 for details about building code compliance requirements. Further information about energy efficiency requirements for new buildings is available from the provincial building code website at www.mah.gov.on.ca, or the municipal building department.

Beginning January 1, 2012, a house designer must use one of four energy efficiency compliance options in the building code:

- 1. Comply with the SB-12 Prescriptive design tables,
- 2. Use the <u>SB-12 Performance</u> compliance method, and model the design against the prescriptive standards,
- 3. Design to ENERGY STAR standards, or
- 4. Evaluate the design according to EnerGuide technical procedures and achieve a rating of 80 or more.

COMPLETING THE FORM

B. Compliance Options

Indicate the compliance option being used.

- <u>SB-12 Prescriptive</u> requires that the building conforms to a package of thermal insulation, window and mechanical system efficiency requirements set out in Subsection 2.1.1. of SB-12. Energy efficiency design modeling and testing of the building is not required under this option.
- <u>SB-12 Performance</u> refers to the alternative method of compliance set out in Subsection 2.1.2. of SB-12.
 Using this approach the designer must use recognized energy simulation software (such as HOT2000 V9.34c1.2 or newer), and submit documents which show that the annual energy use of the building is equal to a prescriptive package.
- <u>ENERGY STAR</u> qualified houses must be designed to <u>ENERGY STAR</u> for New Homes technical specifications and be labelled on completion by EnerQuality or other agency. The <u>ENERGY STAR</u> BOP form must be submitted with the permit documents.
- <u>EnerGuide80</u> houses are validated by NRCan authorized energy advisors and must achieve a rating of 80 or more when evaluated in accordance with EnerGuide administrative and technical procedures.

C. Project Design Conditions

Climatic Zone: The number of degree days for Ontario cities is contained in Supplementary Standard SB-1 Windows, Skylights and Glass Doors: If the ratio of the total gross area of windows, sidelights, skylights and glass doors to the total gross area of walls is more than 17%, higher efficiency glazing is required. If the ratio is more than 22% the SB-12 Prescriptive option may not be used. The total area is the sum of all the structural rough openings. Some exceptions apply. Refer to 2.1.1.1. of SB-12 for further details.

Fuel Source and Heating Equipment Efficiency: The fuel source and efficiency of the proposed heating equipment must be specified in order to determine which <u>SB-12 Prescriptive</u> compliance package table applies. Other Building Conditions: These construction conditions affect <u>SB-12 Prescriptive</u> compliance requirements.

D. Building Specifications

Thermal Insulation: Indicate the RSI or R-value being proposed where they apply to the house design. Under the <u>SB-12 Prescriptive</u> option, RSI 3.52 wall insulation is permitted in certain conditions where other design elements meet higher standards. Refer to SB-12 for further details.

E. Performance Design Summary

This section is not required to be completed if the SB-12 Prescriptive option is being used.

AIRTIGHTNESS REQUIREMENTS FOR NEW HOUSES

All houses must comply with increased air barrier requirements in the building code. Notice of air barrier completion must be provided and an inspection conducted prior to it being covered. A blower door test to verify the air tightness of the house must be conducted during construction if the *NRCan EnerGuide80* option is used, or if the *SB-12 Performance* or *ENERGY STAR* options are used and an air tightness of less than 2.5 ACH @ 50 Pa in the case of detached houses, or 3.0 ACH @ 50 Pa in the case of attached houses is necessary to meet the required energy efficiency standard.

ENERGY EFFICIENCY LABELING FOR NEW HOUSES

ENERGY STAR and EnerGuide issue labels for new homes constructed under their energy efficiency programs. The building code does not regulate new home labelling.
